Translation Tool (Canon)

Create (Canon)

Senior ASP.Net Developer: Chunk Ideas Ltd

Glasgow, May - July 2006 (Contract)

Contracted to develop ASP.Net and AJAX solutions for the Foster's [Laidback Legends](http://www.fosters.co.uk/laidbacklegends) campaign website. The website is essentially an imitation of YouTube - users can upload video clips through the website or from their mobile phones, which are then voted and ranked in a leaderboard. This was a very exciting application to work on as it brought together some of the more popular aspects of the web and mobile into a single project, as well as the fact that I was required to make use of a variety of skills. The campaign is still running and Chunk continue to employ me on an ad-hoc basis.

<http://www.fosters.co.uk/laidbacklegends>

Senior ASP.Net Developer: Conscia Ltd

Glasgow, Oct 2006 - May 2007

As lead developer of a small team, I was the technical architect developing an enterprise multi-platform web application for Cardinal Security Ltd for several large national retail chains. Employed cutting-edge technologies including NHibernate, ASP.Net AJAX 1.0, Windows Mobile 5.0 and Windows CE and Agile Development methods. Also provided training for other staff members and consultation on an ad-hoc basis within the company.

Senior ASP.Net Developer: Anne Geddes Ltd

Auckland, New Zealand, July 2005 - May 2006 (Contract)

ASP 2.0, SQL 2000, ASP.Net, C#, Email campaign management

Anne Geddes is a New Zealand brand recognised worldwide, with an immense market in the United States and Europe, and a flagship store in Disney, Florida. I engineered two e-Commerce websites to support both international markets, <http://www.freemail.com/> and <http://www.fast2umail.com/> (ASP, COM+, SQL 2000). I also maintained and extended the <http://www.annegeddes.com/> website, and

provided a variety of day-to-day development services, such as email campaign management and software development.

ASP.Net Developer: Switched-On Solutions Ltd

Auckland, New Zealand, Dec 2004 - Apr 2005 (Contract)

C#, ASP.Net 1.1, SQL 2000, Sharepoint STS, STS Web Part Development, LISP STS Site Customisation, SOAP, .Net Remoting

Switched-On Solutions is a small startup based in New Zealand which provides a variety of IT services to local and international businesses, including ASB Bank and GE Money. I was contracted to investigate the feasibility of developing Sharepoint 2003 web spaces for SoS for the purpose of re-selling to other SME's and professionals.

Lead Web Developer: Jennifer Ann Web Ltd

Auckland, New Zealand, Dec 2003 - Dec 2004

ASP.Net 1.1, SQL 7, IIS Management, Email administration

Jennifer Ann Web is a New Zealand-based SME providing marketing services to New Zealand businesses. Alongside my core work of building marketing and e-Commerce websites, I covered nearly all IT-related tasks including email server management and firewall administration.

Web Developer: Real Developments Ltd/Lion Nathan Ltd

Auckland, New Zealand, Dec 1999 - Dec 2004

ASP, SQL 7, CFM/Cold Fusion, VB 6.0/Visual Basic, Crystal Reports

I was offered a permanent package by Auckland-based company Real Developments in 1999, where I was using Cold Fusion and Access, and later ASP and MS SQL 7. The flat structure typical of SMEs (RD was 3 years old) allowed me to learn a variety of skills very quickly, and I applied myself to email & domain administration, SQL database design, optimisation, index construction, as well as an introduction to OLAP. In 2002 Real Developments was acquired by Lion Nathan/Lion Breweries and re-branded to 'Real'.
